INTRODUCTION

Format of Thesaurus

The first section is an alphabetical arrangement of keyword terms. In this section the first 6 digits represent the code number, and the next 2 digits indicate the category in the hierarchical section of the Thesaurus. Digits are followed on the same line by corresponding keywords. The first word is the coded keyword term or concept, followed by a slash //, which separates the coded work from its next hierarchical level. (One, two, or three level hierarchical arrangement.)

The second section is the hierarchical arrangement of the coded terms. It is divided into 10 categories. Each category has up to 3 levels of keyword terms or concepts, each level indented from the preceding level and preceded by a code number.

Usage

The tasks of assigning keyworded code numbers to articles and developing a selected information retrieval strategy should begin with examination of the alphabetical (first) section of the Thesaurus. The 2 digits immediately to the left of each keyword indicates the number of the hierarchical (second) section of the Thesaurus. Within the appropriate hierarchical list available terms may be scanned and those specific to the search request may be identified.

Those who wish to obtain information from the Emergency Programs Information Center or from other data bases that utilize this Thesaurus, are advised to submit their request either directly by telephone or in writing. Personnel who are experienced in thesaurus application can then select the best available coded terms and perform the actual retrieval function.

PREFACE

This thesaurus was developed to fill a need for a method to index and code the veterinary literature for rapid retrieval of specific information on animal diseases exotic to the United States. The thesaurus can be used for coding other diseases as well. This edition contains approximately 4,500 coded terms arranged in alphabetical and hierarchical sections.

Animal Disease Thesaurus is designed for use by persons engaged in the task of coding and cross-indexing appropriate articles before entry in rapid retrieval data systems. It is also intended for use by data retrieval personnel in searching the data base for information that has been requested by epidemiologists, diagnosticians, research scientists, administrators, and others.

Animal Disease Thesaurus is continually revised, enriched, and updated with new concepts and scientific terms. Revisions are printed approximately annually by Veterinary Services, Animal and Plant Health Inspection Service, U.S. Department of Agriculture. The user desiring additional information or updated copies of the Thesaurus should contact:
